1.1 Main Interface

class `doppel.PackageAPI` (*pkg_dict*)

Package API class

This class is used to hold the interface of a given package being analyzed by doppel. It's comparison operators enable comparison between interfaces and its standard JSON format allows this comparison to happen across programming languages.

class_names ()

classmethod **from_json** (*filename*)

Instantiate a Package object from a file.

Parameters **filename** (*str*) – Name of the JSON file that contains the description of the target package's API.

function_names ()

functions_with_args ()

name ()

num_classes ()

num_functions ()

public_methods (*class_name*)

CHAPTER 2
